Splicecom SelectVoice

UC

Native support for Yealink's T3 SIP Phones on the SelectVoice 1000 platform significantly reduces the cost of entry and widens Splicecom's portfolio of Unified Communication devices for the desktop.

The Yealink T3 offers low-cost, entry-level SIP desk phones, complementing the T4 general/busy office and T5 smart business phones. The T3 range when deployed with the SV1000 Navigate Pro Phone Partner ensures advanced phone features via the User's PC whilst retaining the flexibility, ease of use, comfort of smart noise filtering and reliability associated with a desk phone.
